Efficiency

- "Ventilation Gill" on the front panel keeping the cooling unit system ventilated and running more efficiently.
- Forced draft evaporator with anti-corrosion cover.
- Intelligent Air Circulation system ensures perfect temperature consistency with its innovative airflow design.
- Door switch stops the fan when door is opened to avoid cold air exiting the interior, thus saving energy.
- 50 mm thickness, CFC-free, high-density (40 kg/m³) polyurethane insulation, injected under high pressure

Features

- Castors fitted as standard. Height adjustable Stainless Steel legs available as an option (125mm - 200mm).
- Removable pull-out/ push-in magnetic door gasket to keep maximum hygiene and maintain the insulating properties.
- Equipped with 7 internal high capacity drawers 640x400x120mm for fish, made of sanitary PVC with a Stainless Steel perforated base.
- Rounded edge interiors, easier cleaning operations to reduce potential dirt traps.
- Individual drainage of each drawer to the general drainage system, removable for cleaning of the cabinet.
- Automatic evaporation of defrost water. Hot gas coming from the compressor is used to automatically evaporate defrost water, instead of by means of heating elements, achieving even less energy consumption and reducing in half defrost time.
- Intelligent air circulation system ensures perfect temperature consistency with its innovative airflow design, specially suitable to store refrigerated fish or seafood products.
- Hinged doors with automatic return for a perfect closing that minimize temperature gain. Doors have a 120° dwell position and closes automatically at less than 90°. Door hinges are also reversible allowing the cabinet to be adapted on-site.
- Specially designed to provide high humidity and constant temperature throughout all drawers.
